2026年第二季 法人說明會

www.m31tech.com

Aug 12th, 2026

免責聲明

- 本次法說會提供之簡報包含前瞻性陳述，內容包括對於未來狀況之預測及評估。此前瞻性陳述係基於本公司目前可得資訊對未來事件的期望和預測，儘管本公司認為該期望和預測具合理性，但此類前瞻性聲明仍涉及風險及不確定性。
- 鑒於這些風險、不確定性及假設，本公司實際結果可能與這些前瞻性聲明中的預期存在重大差異。若因未來實際結果與預期狀況有重大差異，除非法律要求，本公司將不負責更新或公告這些預測的結果。

2Q26 Financial Results

2Q26 Statements of Comprehensive Income

Selected Items from Statements of Comprehensive Income

(In NT\$ thousands unless otherwise noted)

	2Q26	1Q26	2Q25	2Q26 over 1Q26	2Q26 over 2Q25
Net Revenue (US\$ thousands)	13,305	12,467	14,711	+6.7%	-9.6%
Net Revenue	421,850	394,748	448,722	+6.9%	-6.0%
Gross Margin	100%	100%	100%		
Operating Expenses	(438,685)	(461,015)	(409,530)	-4.8%	+7.1%
Operating Margin	-4.0%	-16.8%	8.7%	+12.8 ppt	-12.7 ppt
Net Income	(2,738)	(49,247)	(40,775)	+46,509	+38,037
Net Profit Margin	-0.6%	-12.5%	-9.1%	+11.8 ppt	+8.4 ppt
EPS (NT Dollar)	(0.06)	(1.18)	(0.98)	+1.12	+0.92
Average Exchange Rate-USD/NTD	31.60	31.65	30.80	-0.2%	+2.6%

* Weighted average outstanding shares were 41,791 units in 2Q26.

** 2Q26 net foreign exchange loss of NTD \$2,702K.

1H26 Statements of Comprehensive Income

Selected Items from Statements of Comprehensive Income

(In NT\$ thousands unless otherwise noted)

	1H26	1H25	1H256 over 1H25
Net Revenue (US\$ thousands)	25,772	28,081	-8.2%
Net Revenue	816,598	883,247	-7.5%
Gross Margin	100%	100%	
Operating Expenses	(899,700)	(836,413)	+7.6%
Operating Margin	-10.2%	5.3%	-15.5 ppt
Net Income	(51,985)	(21,211)	(30,774)
Net Profit Margin	-6.4%	-2.4%	-4.0 ppt
EPS (NT Dollar)	(1.24)	(0.51)	(0.73)
Average Exchange Rate-USD/NTD	31.62	31.82	-0.6%

* Diluted weighted average outstanding shares were 41,791 units in 1H26.

** 1H26 net foreign exchange gain of NTD \$10,396K.

2Q26 Balance Sheets

Selected Items from Balance Sheets *(In NT\$ thousands)*

Operating Result

2Q26 Revenue by Income Source

- In 2Q26, royalties accounted for 17.8% of revenue, and the absolute royalty amount grew by 4.7% QoQ.
- License revenue remains our main revenue driver, accounting for 82.1% of total revenue in 1H26.

2Q26 Revenue by Region

- In 1H26, revenue mix became more concentrated in China and Taiwan, with U.S. revenue weighted toward project enhancements.
- In 1H26, revenue from China and Taiwan increased 34.5% and 14.3% YoY, supported by robust demand from fabless customers and foundry projects.

2Q26 Revenue by Customer Type

- In 2Q26, the revenue mix shifted significantly toward Fabless customers, accounting for 81% of revenue, a five-quarter high, compared with 47.5% in 1Q26.
- Fabless became the primary revenue contributor in 1H26, accounting for 64.8% of revenue, up from 51.6% in 2025.

2Q26 Fabless License Fee by Nodes

- In 2Q26, 12~16nm nodes were the key driver of Fabless license fees (43.6%), with advanced nodes below 16nm accounting for a significant 68.3% of the total.
- Sub-16nm Fabless license fees have continued to gain share since 2024, accounting for nearly 60% in 1H26.

2Q26 Foundry License Fee by Nodes

- In 2Q26, sub-16nm nodes continued to account for over 50% of Foundry license fees, including new platform engagements at 2~8nm nodes.
- From 2024 to 1H26, the share of Foundry license fees from sub-16nm nodes showed a steady increase, rising from 44.6% to 75.3%.

M31 Customers & Partners

Region	Fabless	Foundry	Total
China	266	10	276
USA	82	2	84
Taiwan	77	5	82
Korea	12	3	15
Japan	8	0	8
Eurasia	25	3	28
Others	2	0	2
Total	472	23	495

* Our IP solutions are adopted by leading foundries and fabless worldwide.
 * Customer numbers by region and business type till 2Q26.

M31 Licenses

Note: Terms (including number of process platforms and licensing fees) for each technology license are set contractually. Payments are made according to set milestones, and there are no particular seasonal factors involved.

Recap of 2Q26 Operating Result

2Q26 operating performance improved, with revenue rising 6.9% QoQ to NT\$422 million. EPS recovered from -1.18 to -0.06, as losses narrowed significantly. Revenue was down 6.0% YoY due to delayed large projects, while increased R&D hiring led to a roughly 7% rise in operating expenses.

Licensing:

- In 2Q26, 16nm-and-below nodes contributed 67.4% of license revenue, driven by AI vision, smartphone, AI accelerator, AIoT, memory, and automotive chip projects in U.S. and China. New sub-6nm projects with a leading foundry also commenced during this quarter.
- For 2H26, we expect more leading-edge design starts from fabless customers in smartphone, sport camera, and ADAS applications. We also look forward to our first collaboration with an U.S. IDM and new projects from the U.S. specialty-process foundry.

Royalties:

- In 2Q26, sub-16nm royalty revenue grew nearly 400% YoY and accounted for over 30% of total royalty revenue, reflecting growing advanced-node royalty momentum.
- We expect more meaningful advanced-node royalty contributions in 2H26 as customers ramp mass production.

Recent Updates

Private Placement

- The Board approved a private placement, with ASPEED Technology Inc. subscribing to 530,000 shares, representing a 1.24% equity stake. The investment strengthens the long-standing partnership between the two companies and supports deeper collaboration in server interface IP, product development, and customer engagement.

Corporate Governance & Sustainability

- The Company was recognized in the top 5% of the Corporate Governance Evaluation for the fifth consecutive year, underscoring its commitment to transparency, sustainable management, and long-term stakeholder value.

1H26 Revenue Analysis

Foundry and China Market IP Demand Rebound & Royalties

- In 1H26, **fabless customers** showed substantially **stronger demand** compared with foundries.
- Driven by strong demand from **high-end consumer electronics** and **AI applications**, revenue from the **China market** saw a clear boost.
- In 1H26, **royalty revenue** has increased to nearly **18%**.

1H26 License Fee by Nodes

Fabless 22-28nm/sub-16nm & Foundry 6nm below for Growth driver

- **Fabless** customers are steadily kicking off **22-28nm** new projects, alongside an increasing number of new design starts at **nodes below 16nm and 6nm**.
- **Foundry** demand is shifting from mature to advanced nodes at **6nm and below**.
- In 1H26, IPs at **16nm and below** account for **nearly 63%** of total license fee.

M31 Automotive IP Platform

Foundation

Standard Cell : Low Power, High Speed, High Density
SRAM : Single Port, Dual Port, 1PRF, 2PRF, ROM
Specific I/O: GPIO, LVDS, RGMII, eMMC, PSRAM IO

Driving Comprehensive Solutions
for Automotive Needs.

High Speed Interface

Future: Chiplets – “More-than-Moore” Solutions

Smaller Disaggregated SOCs

Scalable architecture: adds dies to increase performance

Cost effective due to better yields with smaller die

Reduced time to market by combining custom SoC + available die

Single System-on-Chip (SoC)

Chip size limited to maximum reticle size

Very large die typically with lower yield and power limit **Bandwidth limited** to number of IO (data interconnect) on die **Time to market constrained** by design complexity and IP readiness

Core SoC With IO Chiplets

Higher Bandwidth enabled by increased number of IO **Reduced time to market:**

- Mix die from different nodes
- Use pre-verified chiplets

Lower development cost by sharing pre-built chiplets across products

Future Prospect

M31 Uniquely Positioned for Growth

High-Growth
