Revenue engine 1

TM4 + premium CCD drilling

The industry's only ±2 mil precision back drilling solution

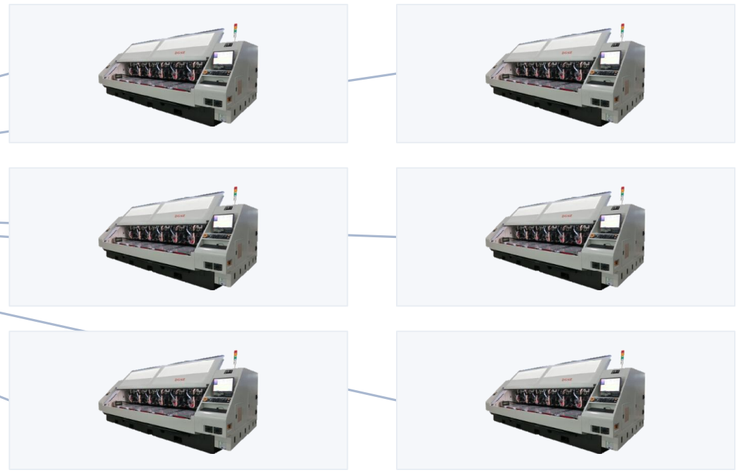

StubMapper™ (TM4)

Proprietary

Estimated 5-6 units

Ta Liang 6-spindle CCD drilling

Bundled w. TL CCD drilling

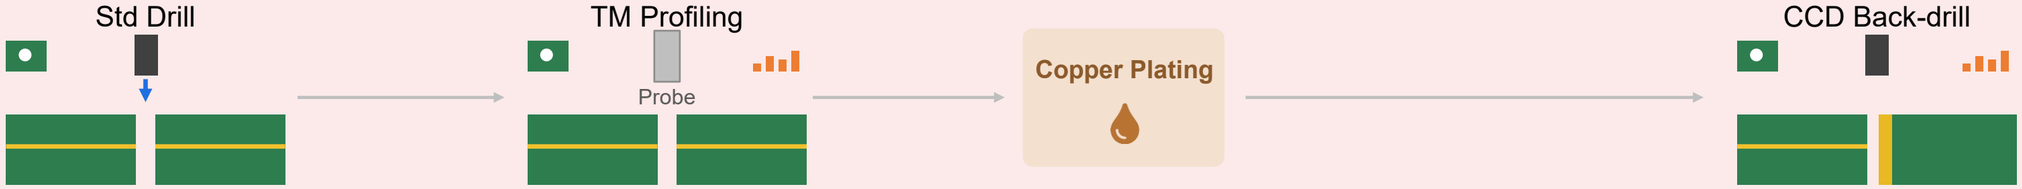

One TM4 drives an estimated 5-6 units of CCD drilling machines.

TM4 data — proprietary, TL-exclusive

Major applications

AI Servers (224G SerDes) — ±2 mil back-drilling. Requires TM4

High-End PCBs — precision through-hole drilling. Standalone

Revenue engine 2

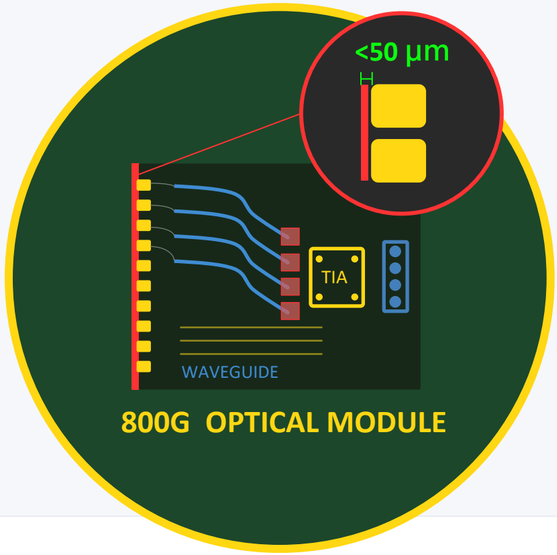

Premium CCD Router

大量科技 TA LIANG

PREMIUM · CCD SERIES ROUTER

Optical modules in Production

Application

CPO — sub-25 µm precision of edge to bonding-pad for 1.6T optical modules

Premium PCBs — precision routing for high-end PCB fabrication

Growing demands

CPO's growth — driving high demand for the CCD router

Revenue engine 3

Standard drilling/router

大量科技 TA LIANG

The commodity, high-throughput baseline — no CCD, built for volume

Standard-Class drilling/router

No CCD | High Throughput | Stability

Key messages

Defined by throughput and stability

No CCD vision system. What matters here is throughput and stability — running volume reliably.

Commodity, steadily growing

3–5% annual growth for this segment.

Demand is concentrated

Most low-end orders come from large PCB fabs, not smaller shops.

Revenue engine 4

TL Smart & Edge Coater

A spun-off equity stake and an early-stage growth opportunity

TL Smart

SPUN-OFF BU · 100% TL-OWNED

Spin-Off, Effective 8/1/26

TL Smart is now an independently operating entity — no longer a TL business unit.

>60% TL-Owned After IPO

5–8% projected share of total TL revenue.

100% owned today; TL will retain a majority (>60%) stake once TL Smart completes its IPO.

Edge Coater

EARLY-STAGE · GROWTH OPPORTUNITY

Immaterial in 2026

Revenue contribution is not yet material to TL's overall results.

Significant Growth Ahead

Expected to become a meaningful revenue contributor in the near future.

Drilling/Router Mfc. Capacity

Drilling/Router Competitive Landscape

大量科技 TA LIANG

	Ta Liang		Company A	Company B
	Drilling	Router		
Metrology	**Sole Provider** StubMapper™ — exclusive	**N/A** Not applicable	**Not Present**	**Not Present**
Premium	**Gaining Share** Metrology-driven execution	**~40% Share** Market leader	**Established** High ASP, established position	**Discounted** Lower ASP
Standard	**Slow Growth** Capacity preserved for premium	**~30% Share** Market leader	**Limited** Premium-only focus	**Large Capacity** Aggressive pricing

Router market share (~40%) reflects Ta Liang's estimated position across both premium and commodity segments.

Operating Momentum Update

Scaling Capacity, Broadening Demand

大量科技 TA LIANG

Capacity Expansion: 300 → 400 unit/m

Monthly in-house production capacity lifted by ~33%.

Outsourcing Ramp: +50 unit/m in Q4

Incremental outsourced capacity is on track for realization in Q4, extending effective output without new capex.

Metrology Leadership Unchallenged

Our position in ±2 mil back-drill metrology remains uncontested — the precision threshold required for advanced AI server.

High-End PCB Router Momentum

Premium routing systems are seeing standout demand from the CPO segment, a second growth vector alongside metrology.

BROADENING CUSTOMER BASE

Aggressive order growth from major PCB fabs reflects demand diffusion across the industry — not dependence on a single program.

Corporate update

Ta Liang Smart: Spin-Off & IPO Update

Semiconductor equipment BU becomes an independent company, effective 8/1/26

Ta Liang Smart

SPIN-OFF · EFFECTIVE 8/1/26

New Independent Entity

As of 8/1/26, TL's semiconductor equipment business unit has become an independent company, Ta Liang Smart.

100% TL-Owned Today

100% owned by Ta Liang ahead of the planned listing on Taiwan‘s 上櫃.

IPO & Listing

SCHEDULED LISTING · 上櫃

Listing Venue: 上櫃

Ta Liang Smart is scheduled to be listed on Taiwan‘s 上櫃 (OTC).

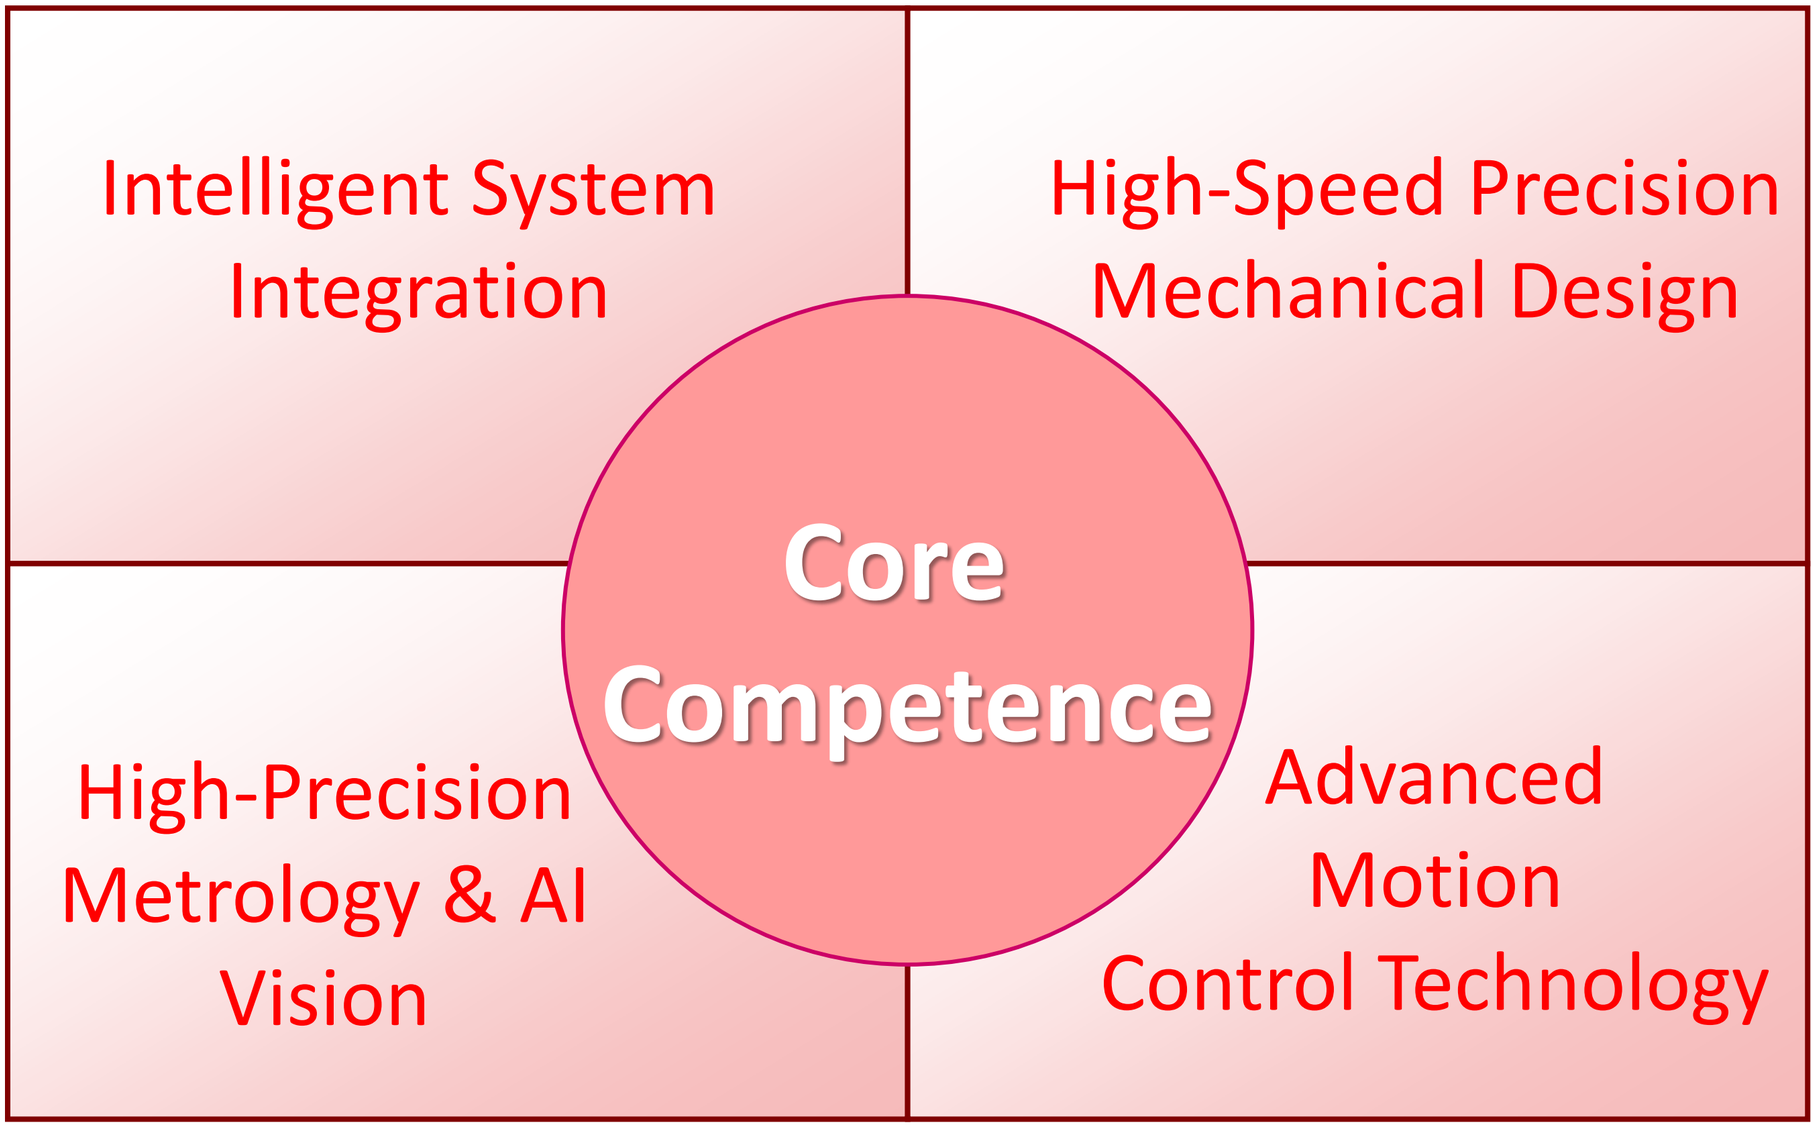

>60% TL-Owned After IPO

Following the IPO, parent company Ta Liang will retain a majority >60% ownership stake in Ta Liang Smart.
